POWER COMMANDER V

•Full fuel and ignition timing control for each cylinder with a new smaller enclosure

•The REV Xtend feature increases stock rev limiter

•Switch betwen two maps "on the fly" and maps can be adjusted on a

"per gear" basis (one map per cylinder, per gear if required)

•Adjustment of fuel and timing based on engine temp is provided by the "Cold Start" feature

Will power up with USB cable only for programming
 NOTE: Not legal for sale or use on pollution controlled vehicles

POWER COMMANDER III USB

*USB (Universal Serial Bus) port provides an instant, problem-free way to connect your Power Commander to a computer

*Provides precise information for fine-tuning a fuel-injected motorcycle when changing an air filter, installing a new exhaust

system or doing additional engine performance modifications

•Each unit includes a built-in microprocessor and a specific map designed to improve engine performance over stock;

Dynojet continuously maps new calibrations for each bike, which are available for downloading at their website (www.powercommander.com)

•If you do not have a computer, you can change the settings with three touch buttons on the faceplate

•OEM-style wiring connectors with improved harness protection are supplied; no wiring modifications required

•Includes easy-to-follow instructions

•Direct injector control technology manages the fuel curve on models that do not have the sensors to monitor fuel adjustment

•Features an expansion port for future add-on modules from Dynojet

•Software is compatible with Windows 98se/ME/2000/XP; opens all maps with .djm extension

•USB special cable and 9V battery power adapter are included

•Made in the U.S.A.

•Adapters allow you to activate a Power Commander for changing or altering maps while disconnected from the bike

Professional adapter is ideal for service/parts department applications, consumer adapter is for limited use

NOTE: Not legal for sale or use on pollution controlled vehicles.

NOTE: Some products may not be legal for sale or use on pollution controlled vehicles, check your local laws and the manufacturer's information.

All part numbers in **BOLD MAGENTA** are new for 2009.

& GENERAL

CALIFORNIA A.R.B. APPROVED POWER COMMANDER III USB-EX

- •Provides virtually the same tuning functionality as the original Power Commander III USB
- Compatible with Tuning Link software
- •Creates full fuel adjustability, fuel and ignition mapping and custom maps
- •A built-in ignition module and ignition timing changes of up to +/- 10° are also incorporated
- •Rev X-tend feature allows you to increase the stock rev limiter to 6200 rpm
- •Maps created for Power Commander III USB can be loaded and will
- automatically be converted to the proper format
- •Will work with any exhaust system
- Increases torque and horsepower

With multi function hub

1020-0326

Without multi function hub

PART #	DESCRIPTION	SUG. RETAIL
1020-0325	LCD display for Power Commander	\$299.95

LCD DISPLAY ACCESSORY FOR **POWER COMMANDER III USB/USB-EX**

- Connects to any Power Commander USB via a "quick-disconnect" cable
- •Designed to remain on the bike at all times, even in harsh weather
- •Displays all available data from the Power Commander when connected
- Stores and switches between multiple maps in the on-board memory; maps can be sent to the Power Commander "on the fly"
- •Adjust maps using the controls on the display screen
- •Logs data for later analysis
- •Increase data storage for maps and logging by adding an SD Memory card; sold separately
- •Can be easily removed from the bike to be programmed with a desktop computer
- USB programmable and upgradable
- •Uses an active matrix TFT LCD 240 x 320 16-bit screen

MULTI-FUNCTION HUB ACCESSORY FOR POWER COMMANDER USB/USB-EX

- •The Multi-Function Hub allows access to advanced expansion features of the Power Commander USB
- Compatible with the LCD display,
- but the display is not required
- •Four separate functions can be

WIDE BAND COMMANDER

- accessed with the Multi-Function Hub
- •The Map Selection Switch (7/8" bar mount) allows the rider to switch between two different maps in the Power Commander. This allows a map for economy
- and a separate map for performance
- •The Gear Position/Speed function allows fuel and timing adjustments to be made depending on the gear selected and the position of the throttle, up to +/-50% fuel and +/-10 degrees of timing
- Pressure input allows the fuel to be increased along with the boost level on turbocharged installations. The change of boost level does not require a re-mapping of the Power Commander
- •Relay outputs allow up to two warning lights or relays to be triggered independently to activate items such as shift lights, nitrous systems, or air shifter. The trigger can be by throttle percent, rpm, or both
- Comes complete with installation instructions, wiring diagrams and CD with the required software updates

PART #	DESCRIPTION	SUG. RETAIL
1020-0326	Multi-Function Hub and wiring harness for Map Selection Switch only	\$159.95
1020-0327	Multi-Function Hub and wiring harness for Map Selection, Gear Position, Speed sensor, Pressure Input and two relay outputs	189.95

1020-0085

AIR/FUEL RATIO MONITOR Unlike current narrow band air/fuel ratio systems, Dynojet's Wide Band Commander module uses a Bosch 5-wire LSU 4 wide band sensor that can read ratios from 10.0:1 to 18.0:1

 When installed, the Wide Band Commander provides a 21/16" black- or white-faced 270° sweep electric air/fuel ratio gauge with programmable warning light and mounting hardware, plus data recording that can be retrieved and analyzed with the supplied software package

Software package requires Windows® SE/ME/2000/XP computer

- Onboard memory allows data to be logged, without using a laptop/PC, for download at a later time
- •Log file data can be played back in the software, or exported as text
- Modular programmable for nitrous, water injection, timing retard and many other engine management options
- •Single wire tach hookup; no tach adapter required
- •Includes all required sensors, cables, software, 9V power adaptor and all installation materials; the most complete kit on the market
- •Requires drilling hole in exhaust system to mount oxygen sensor
- •18mm x 1.5mm oxygen sensor weld boss and plug included; when not powered, sensor must be removed and plug attached in mounting hole in exhaust system
- •Dynolink compatible allows Wide Band Commander to communicate with WinPEP7
- Exclusive website for software updates and technical tips: www.widebandcommander.com

FUELPAK

- Available in original version which is not legal for sale in CA or new California A.R.B approved version with all the same features as the original
- •Throttle position sensor-based system simplifies the process of fuel-injection tuning
- •Enables you to fine-tune the fuel mixture throughout the entire rpm range with the touch of a button
- •Increases power and improves throttle response
- •Very user friendly; plugs into the existing harness on the bike
- •No computer or software is required, simply punch in the values supplied with the Fuelpak
- •Values supplied are for use with Vance & Hines exhaust systems
- •Fuelpak will also work with other exhaust systems (contact V&H tech support for tuning information) •Includes all necessary mounting hardware

NOTE: Not legal for sale or use on pollution controlled vehicles.

NOTE: Requires the use of a high-performance air filter.

user-selectable base fuel curves designed

to improve engine operation on fuel-injected models

- •Can be configured to suit a wide variety of modifications
- Adjustments are made via three potentiometers that adjust the fuel
- curve in the proper ranges for the application
- •Fuel mixture can be enriched or leaned as required
- •Uses factory connectors for easy installation there is no PC required for tuning or adjusting the fuel curves
- •No modifications to the stock ECU
- •Removing the FI controller returns vehicle to factory configuration

NOTE: Not legal for sale or use on pollution controlled vehicles.

1020-0821

- **FUEL INJECTION TUNER** A load-based fuel injection module; does not require splicing or modifications to motorcycle during installation •Comes pre-loaded with base maps for different models which can then
- be fine tuned to individual riding style and bike • Laptops and dyno machines are not required during tuning to maximize performance
- •Utilizes the latest in load-based technology in fuel injection performance •Detects the exact amount of load on the engine at any RPM and any road speed; delivers the perfect amount of fuel to the engine for
- optimum performance A superior design over fuel injection modules that work off throttle position

NOTE: Not for sale in California

FI2000R PLUG-IN FUEL PROCESSOR

- •Proven Fi2000R comes with leads that snap directly into the bike's injector bodies
- •Standard open-loop design for 06 Dyna and all 07-08 models can use exhaust systems that do or do not have 0, sensor bungs
- More advanced tuning for modified bikes
- •Think of third tuning pot as an electronic main jet while thinking of the entire Fi2000R as a digital jet kit
- •Full range of fuel adjustment (0-10 settings) across all rpm ranges
- •Three easy identifiable lights: green Fi2000 is adding more fuel to the air/fuel ratio approx. 14:1; Green and yellow lights these lights will be on in unison when throttle is open more quickly and air/fuel mixture is approx. 12.5:1; Red - light comes on and stays on as long as the Fi200 follows the fuel curve while adjusting to approx. 12.8.1 air/fuel ratio, which is where the engine will produce its best full-throttle power
- Step-by-step instructions
- •Improves rideability by smoothing out the powerband and giving the bike more throttle response
- •Corrects lean air/fuel mixture problems; eliminates overheating, backfiring on deceleration, hesitation on acceleration or an uneven cruising rpm
- Waterproof circuit board
- •No fuel map adjustments or computer downloads required

NOTE: Standard models not legal for operation on public highways in the state of California.

FI2000R 02 **FUEL PROCESSOR**

•The Fi2000 O2 digital fuel processor is designed to work with all H-D exhaust systems (stock or aftermarket) equipped with oxygen sensors in place (closed-loop design)

- •Works much like a carburetor jet kit with adjustments similar to the air-mixture screw, the needle and clip positions and the main jet
- •The Fi2000 increases horsepower and torque by optimizing stock lean air/ fuel mixtures (helps cool the engine temps as well)
- •Quick and simple installation with plug-and-ride technology with OEM-style connectors
- •No confusing computer downloads to install
- •No expensive dyno testing required
- •Pre-configured from the factory for your make and model, but easy to adjust should your specific application need it
- •Improves overall rideability
- Virtually eliminates backfiring on deceleration

NOTE: Standard models not legal for operation on public highways in the state of California.

1022-0008	Repl. WEGO II oxygen sensor	112.95
7806-1563	18 x 1.5mm weld nut (for mounting sensor to exhaust pipe) (ea.)	5.95
7806-1564	18 x 1.5mm hex socket plug (for plugging 18 x 1.5 hole after tuning) (ea.)	5.95

TWIN TUNER FUEL-INJECTION CONTROLLER

•Allows easy adjustments to OEM Delphi fuel-injection systems to improve performance and match the requirements of performance parts

•Mode and up/down pushbutton switches make fuel trim adjustments in the RPM and throttle position ranges required by most applications; fuel trim value is displayed on a bright daylight-readable LED display

 Advanced mode (using optional USB Interface PART #2101-0075 and PC Link Tuner software) allows precise fuel adjustments and independent adjustments to the front and rear cylinders

•Can use DynoJet Power Commander maps

•Easy plug-in installation and setup •Compact size - only 4" L x 2" W x 1/2" H

•Compatible with Twin Scan II+ Tuning Aid – install the Twin Scan II+ and ride the bike, then copy the air/fuel ratio corrections calculated by the Twin Scan II+ into the PC Link Tuner software

NOTE: Not legal for sale on use on pollution-controlled vehicles.

DESCRIPTION	SUG. RETAIL
For 01-09 Big Twin w/ 36-pin Delphi EFI	
(except 08-09 Touring models w/ electronic	
throttle control) and 08-09 Buell XB,	
1125R w/ DDFI fuel-injection system	\$217.95
For 99-07 Buell w/ DDFI fuel-injection system	217.95
	For 01-09 Big Twin w/ 36-pin Delphi EFI (except 08-09 Touring models w/ electronic throttle control) and 08-09 Buell XB, 1125R w/ DDFI fuel-injection system

NOTE: Some products may not be legal for sale or use on pollution controlled vehicles, check your local laws and the manufacturer's information.

🐒 Daytona Twin Tec

TWIN TUNER EX

- •Allows easy adjustments to OEM Delphi fuel-injection systems to improve performance and match the requirements of performance parts
- •50-state street legal (ARB E.O. D-641) fuel adjustments with the Twin Tuner EX are only allowed above 60% throttle position or 5000 rpm
- Mode and up/down pushbutton switches make fuel trim. adjustments in the RPM and throttle position ranges required by most applications; fuel trim value is displayed on a bright daylight-readable LED display
- •Advanced mode (using optional USB Interface PART #2101-0075 and PC Link Tuner software) allows precise fuel adjustments and independent adjustments to the front and rear cylinders
- Can use DynoJet Power Commander maps
- •Easy plug-in installation and setup
- Compact size only 4" L x 2" W x ¹/₂" H
- •Compatible with Twin Scan II+ Tuning Aid install the Twin Scan II+ and ride the bike, then copy the air/fuel ratio corrections calculated by the Twin Scan II+ into the PC Link Tuner software

PART #	DESCRIPTION	SUG. RETAIL
1020-0835	For 01-08 Big Twin w/ 36-pin Delphi EFI (except 08 Touring models w/ electronic throttle control)	
	and 08-09 XB, 1125R Buell w/ DDFI fuel-injection system	\$217.95

🕸 Daytona Twin Tec

USB INTERFACE

- •Interfaces all Daytona Twin Tec engine controls (ignition and fuel injection systems) to USB port on newer laptops
- •Includes all required adapters for PART #s DS-242372, DS-242374, DS-242375, DS-242377 and 2101-0034 ignitions and 1021-0001, 1021-0002, 1021-0004, 1021-0005 and 2101-0076 fuel injection systems
- Compatible with all Daytona Twin Tec software and Windows 98/MN/XP (updated software drivers included on CD-ROM)
- •Includes 6' USB cable
- •USB interface allows you to connect to laptops with no serial port, and to multiple engine controls; no need for multiple cables or separate **USB** adapters
- •A switch activates operation, with one position for TC88 and the second position for all other engine control products
- •Includes a connector that mates with the four-terminal Deutsch data link connector on 99-up Twin Cam 88 models, as well as adapters for earlier Shovelhead and Evolution applications

NOTE: Not compatible with Twin Scan 88 and WEGO II systems, which require a separate adapter.

PART #	DESCRIPTION	SUG. RETAIL
2101-0075	For all Daytona Twin Tec engine controls	\$99.95

TERMINAL VELOCITY III **FUEL MANAGEMENT SYSTEMS**

- •Maximizes performance while decreasing emissions and fuel consumption
- Horsepower and torque increases
- Automatically re-calibrates for modifications made to the motorcycle such as aftermarket exhaust, air cleaner, etc.
- •Adjusts as you ride, compensates for changes in engine load conditions
- Available for Delphi, Magneti-Marelli ECU systems and 08-09 throttle-by-wire models
- Works in conjunction with the factory closed-loop system; some applications use factory O₂ sensors (see chart), other applications include O₂ sensor
- Quick-connect plugs for easy installation
- •Works with factory and race tuner downloads

NOTE: Not for sale or use on California emission-equipmed motorcycles

NOTE. NOT	NOTE. Not for sale of use of california emission-equipped motorcycles.

EZFI TUNER

•Add-on module is perfect for tuning situations that require just a little tweaking: only affects fuel delivery (not stock ECM/TSSM functions such as ignition timing, turn signals, safety, instruments, etc.)

Connects to stock ECM for most stock engines

- •Includes software and instructions
- Optional diagnostic cable available

NOTE: Since the EZFI module does not control ignition timing, it is not recommended for engines over 96" cubic inches with higher than stock compression ratios.

NOTE: Not legal for sale or use on pollution controlled vehicles.

PART # DESCRIPTION SUG. RETAIL FOR ALL 01-07 DELPHI EFI-EQUIPPED BIG TWIN MODELS 1020-0569 EZFI module kit \$229.95

PART # DESCRIPTION SUG. RETAIL FOR ALL 01-07 DELPHI EFI-EQUIPPED BIG TWIN MODELS (CONT) 1020-0570 Diagnostic cable \$104.95

THUNDERMAX ECM WITH AUTO-TUNE CLOSED LOOP SYSTEM

•ThunderMax ECM with Auto-Tune module mounts conveniently in

place of the factory ECM and plugs in to the existing harness

Maps, software and firmware updates available on line at no charge

•Quickly find the best map for your application using SmartLink Map Filters

•With the Auto-Tune, AFR tuning for component and exhaust changes are self-adjusting - simply install,

download a map and ride while Auto-Tune maintains target AFR in all conditions

Includes ThunderMax ECM and Auto-Tune Module, plug-in harness and two wide band sensors,

SmartLink Software and communication cable,

Quick-Start Easy Install and Comprehensive User's Manual, technical support and free software and updates

•Select and install a matching base map and enjoy the efficiency of a balanced fuel curve for throttle response like you've never imagined

•No extensive dyno tuning required for most models

•Alpha-N design unaffected by long duration camshafts

•Replaces factory ECM - easy plug-in installation and set-up

•Simple adjustable rev limit, idle, speedo calibration and decel pop control settings

• Easily adjust fuel, ignition timing and cold start maps

•Supports nitrous and supercharger applications

•Versatile – plug and ride or live-tune a custom application

Logs engine starts, engine temperatures and total hours

of operation time in 100 RPM increments

•Read diagnostic codes through software or traditional methods

•Record live data during riding or tuning sessions;

choose replay speed for data analysis

•ThunderMax includes SmartLink Software and cable for easy PC tuning, maps for popular engine combinations and Quick-Start Easy Install and Comprehensive User's Manual

NOTE: Legal in California only for racing vehicles which may never be used upon a highway.

THUNDERMAX 50

- •California ARB-legal (Executive Order #D-644) complete replacement engine management system for all 01-06 88 cu. in. Delphi®-equipped EFI model Harleys
- •ThunderMax 50 converts these open-loop EFI bikes to a feedback system that automatically corrects air fuel ratios through the use of wide-band oxygen sensors and the ThunderMax AutoTune module
- •This system allows continuous AFR tuning, keeping the engine at the specified air fuel ratio regardless of the changes in ambient conditions or terrain the vehicle is being operated in without tuning on a dynamometer
- •Features increased torque and power over the stock system and maintains excellent fuel economy
- •System properly self-tunes aftermarket exhaust systems
- Adjustable rev limiter
- Provides access to read vehicle diagnostic trouble codes

PART #	DESCRIPTION	SUG. RETAIL
1020-0837	For 01-06 Softail, 04-05 Dyna and 02-06 Touring models	\$899.95

THUNDERMAX EFI AUTO-TUNE MODULE

- •Interfaces with the ThunderMax ECM to provide real-time data of the air/ fuel ratio read by wide-band oxygen sensors installed in the exhaust system
- •Data is processed in milliseconds by the ThunderMax, which makes instant adjustments to maintain the front and rear cylinder air/fuel ratios specified by the SmartLink software, creating a self-tuning system
- Modular design attaches directly to the ThunderMax ECM, eliminating any mounting hassles
- •Allows ThunderMax ECM owners (version 4.0 and higher) to add true wide-band closed-loop automatic tuning
- •System fits all 01-08 EFI Harley-Davidson models equipped with ThunderMax (V.4+) ECM (PART #1020-0321)
- •Requires exhaust system fitted with bungs for oxygen sensors
- •Allows the user to program the desired air/fuel ratio for maximum power, maximum economy or anywhere in between
- •Targets specific AFRs, which adjust as you ride
- •Includes two wide-band oxygen sensors
- •No splicing required, system simply plugs into the factory wiring
- harness for total closed-loop functionality
- •Special Feature you can view live air/fuel ratios without a

computer link by using a ThunderMax digital speedometer NOTE: Legal in California only for racing vehicles which may never be used upon a highway.

PART # DESCRIPTION 1020-0322 Thundermax EFI Auto-Tune Module

THUNDERMAX ECM

- •Open loop system allows you to take control of your EFI-equipped motorcycle
- •Maps, software and firmware updates available on line at no charge
- •Quickly find the best map for your application using SmartLink Map Filters
- •Includes ThunderMax ECM, SmartLink Software and communication cable, Quick-Start Easy Install and Comprehensive Users Manual, technical support and free software and updates
- •Select and install a matching base map and enjoy the efficiency of a balanced fuel curve for throttle response like you've never imagined
- •Alpha-N design unaffected by long duration camshafts
- Replaces factory ECM, easy plug-in installation and set-up
- •Simple adjustable rev limit, idle, speedo calibration and decel pop control settings
- Easily adjust fuel, ignition timing and cold start maps
- Supports Nitrous and Supercharger applications
- •Versatile plug and ride or live-tune a custom application
- •Logs engine starts, engine temperatures and total hours of operation time in 100 RPM increments
- •Read diagnostic codes through software or traditional methods
- •Record live data during riding or tuning sessions; choose replay speed for data analysis
- •ThunderMax includes SmartLink Software and cable for easy PC tuning, maps for popular engine combinations and Quick-Start Easy Install and Comprehensive User's Manual
- •Expandable to "closed loop" with available ThunderMax Auto-Tune module

NOTE: Legal in California only for racing vehicles which may never be used upon a highway.

DESCRIPTION PART # SUG. RETAIL For 01-09 w/ Delphi EFI (except 08-09 Touring models) 1020-0321 \$485.95

THUNDERMAX PIGTAIL HARNESS

- •Allows a second port for the communication cable connection to the ThunderMax
- •It is installed to the bike's wiring harness at the 36-pin ECM connector (connection requires harness plug disassembly; two terminated wires are inserted into two unused ports in the 36-pin connector, and a ground wire added)
- Handy for motorcycle models with tight clearances around the ECM such as Dyna, Softail Rocker and 02-05 V-Rod models

NOTE: Requires ThunderMax ECM with serial number 114000 or higher (produced beginning August 2008). Will not work on previous model ThunderMax ECM

SUG. RETAIL DESCRIPTION PART # 1022-0059 ThunderMax pigtail harness \$18.95

INDUCTION MODULE ASSEMBLY O-RING KIT

•Kit contains fuel fitting O-rings

•Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
DS-174988	For 95-01 FLT, FLHT, FLHR fuel-injected models; repl. OEM #17043-95	\$15.95

SUPER E AND G SHORTY CARBURETOR KITS

•Each carb kit includes an S&S Super E or Super G gas carburetor, S&S teardrop air cleaner assembly, manifold, (unless noted) mounting hardware, fuel line, clamps, overflow line, one extra intermediate jet and two main jets, VOES tubing (when applicable), installation and jetting instructions

•Super E has a 17/8" (47.6mm) throat at the butterfly and a 19/16" (39.6mm) venturi and is recommended for use on Big Twin or Sportster engines up to 100-cubic-inch

•Super G has a $2^{1}/16^{\circ}$ (52.3mm) throat at the butterfly and a $1^{3}/4^{\circ}$ (44.5mm) venturi and is recommended for use on 90-cubic-inch and larger high-performance and modified engines •21/16" G is not recommended for smaller, lower compression engines

•If there is a doubt as to which carburetor to use, we suggest the 17/8" Super E

•Carburetors only also available

NOTE: S&S Super E & G carburetors require the use of a two-cable, pull open/ pull close throttle assembly; S&S kits are compatible with stock cables except as noted.

NOTE: Kits for 88-03 XL models require the use of 81-87 style cables or custom cables;

custom braided cables for XL models are available (see section 13)

NOTE: To use S&S Super E and Super G carb kits on Buell models, the stock throttle and idle cables must be changed. All 94-95 models, and the 96 S-2 and S-2T Thunderbolt (models that use Harley-style switches on 1" handlebars), should use throttle cable PART #DS-223533 and idle cable PART #DS-223534. All 96-02 S-1 Lightning, 97-01 S-3 and S-3T Thunderbolt, 97 S-2 and S-2T Thunderbolt and 97-02 M-2 Cyclone (models with European-style controls on 7/8" handlebars) will use throttle cable PART #DS-223529 and idle cable PART #DS-223530.

IMPORTANT NOTE: Recommended for racing only, this carburetor is not legal for use in California on motor vehicles operated on public highways or in other states where similar pollution laws may apply. User must determine the suitability of the product for his or her use and assumes all risk and liability in connection therewith.

42MM MIKUNI CARB KITS

•Kits include 42mm Mikuni carburetor, Hi-Flow Mikuni air filter assembly with chrome cover, Rivera intake manifold with cast finish and all required brackets and mounting hardware

• Easy to install and tune

NOTE: Will require the use of a dual cable throttle assembly and 90-06 style cables.

,		
PART #	DESCRIPTION	SUG. RETAIL
1001-0009	For 70-84 Shovelhead motors	\$740.95
1001-0010	For 57-85 Iron Head Sportster motors	
	(except models w/ magnetos)	725.95

BENDIX CARBURETORS

•Most offer adjustable high-speed jets; all provide improved acceleration and easier, quicker starts

Made in the U.S.A.

\$1,039.95

NOTE. All Pendix carbs may be used for other applications provided correct cables are used

PART #	DECEDITION CHE DETAIL	
	DESCRIPTION	SUG. RETAIL
DS-289078	40mm high-performance carb w/ adjustable main jet, standard finish,	
	for all L81-89 H-D w/ dual-throttle cable linkage (will not fit models w/	
	CV carbs unless choke hook-up is fabricated, intake manifold purchased	
	and cables modified)	\$445.95
DS-289081	38mm high-performance carb w/ adjustable main jet, std. finish, for	
	69-75 Shovelhead; 57-75 XL (except models w/ magnetos)	319.95
DS-289080	38mm standard repl. Bendix carb w/ fixed main jet, std. finish, for

super-flow intake manifold specifically

designed for the large venturi 48mm

a 48mm Mikuni carburetor-

manifold kit

Mikuni carburetor

and gas mileage

with cruise control.

Polished finish

PART #

38MM CARB KIT

•Kit includes carb, manifold adapter, hose clamps, throttle cable and two main iets, as well as a chrome front K&N air cleaner

NOTE: Does not include manifold.

PART # **DESCRIPTION** DS-289086 38mm Mikuni carb kit for FX, FL and XL models to 81, or L81-89 H-D models with single-cable throttle control

HIGH-PERFORMANCE CARB KIT

- •Kit includes chrome-plated 40mm carburetor, fittings, adapters, accessories and installation instructions
- Offers quicker starts and improved acceleration
- •Designed to fit OEM or performance air filters
- Easy bolt-on installation

PART #	DESCRIPTION	SUG. RETAIL
1002-0001	For 90-99 Evolution Big Twin models	\$643.95

\$256.95

EDELBROCK PERFORMER SERIES CARBURETORS

- •EPS carburetors feature an adjustable accelerator pump for instant throttle response and easier starting
- •Offer replaceable main jet for precise fuel metering for exceptional top-end performance; an idle air bleed system to set idle fuel independently from other circuits, and a flat needle for superior fuel atomization that allows external needle adjustment without carb disassembly
- •Sealed 440 stainless steel shaft gives smooth operation for a lifetime; hard anodized flat side makes for unsurpassed wear resistance
- •Float bowl features an O-ring sealed fuel banjo that rotates 180° for easy custom fuel-line routing; each carb is wet flow-tested for quality
- Available in Quick Kits
- •Quick Kits are designed to be used with stock OEM manifolds, cables and air cleaners
- •Available in ball-burnished (plain) in 38 or 40mm sizes
- •Replacement air filter element PART #E-3250 also available; SUG. RETAIL \$42.95

NOTE: Carbs for 88-03 XL, 90-06 Big Twins spigot mount; all others are flange mount.

NOTE: Some 86 883 and 1100 XL models have extra-large cylinder fins, so carbs may need to be spaced or fins modified.

DS-289306

THE ORIGINAL "POWER TUBE" **ATOMIZER**

 Atomizer power tube and jets are CNC-machined from brass for consistency and accuracy

•Power tube jet kits provide fine tuning with increased horsepower when using a less restrictive

air cleaner and exhaust •Converts fuel from a squirting liquid to a fine mist

•Eliminates spitting and popping through the carburetor

 Master kits include slow jets, main jets, slide spring, drill bit and needles Made in the U.S.A.

NOTE: Covered under the following U.S. patent #s: 5,233,180/5,562,868/5,66 2.836/5.810.264/6.270.060.

STAGE 1 JET KIT

- •Designed for motorcycles with stock engines using stock airbox, air filter and stock or aftermarket exhaust
- Non-accelerator pump models
- •Fully adjustable to allow for the use of well-designed aftermarket
- exhausts and stock replacement air filter
- •Improves throttle response and driveability •Power increases of approximately 5% throughout the entire power range

PART #	DESCRIPTION	SUG. RETAIL
DJ-8101	88-89 XL 883/1200 models	\$96.95

JET KIT

Performance Products

•Recalibrate your stock CV carb to make the most out of the air cleaner, exhaust and cam changes or head work

•Kit contains a #5 MAHR needle, 08BOO jet holder,

#45, #48 and #50 slow jets, and #190, #195, #200 and #205 main jets

•Suggested jetting guidelines are included with the kit

Made in the U.S.A.

NOTE: Not for use on pollution-controlled vehicles used on streets or highways.

PART #	DESCRIPTION	SUG. RETAIL
DS-195100	For 99-06 Twin Cam 88	\$56.95

Unger Airflow Werks, 🗠

RECALIBRATION KIT FOR 40MM KEIHIN CV CARB

•Super high-quality recalibration kit for CV carbs

•Kit has all the components for dialing in a CV carb with or without an accelerator pump

PART #	DESCRIPTION	SUG. RETAIL
DS-289304	For all 88-99 CV carbs (except Twin Cam 88)	\$36.95

STAGE 7 THUNDERSLIDE WITH JET KITS

- •Stage 7 kits are for 80 plus horsepower engines and include a taller carburetor top for more slide movement
- •Revolutionary composite plastic slide provides unparalleled performance gains in both horsepower and mileage
- •Unique set of lift holes moderate how the slide moves with respect to throttle position; the faster the slide opens, the quicker the throttle response
- •Kits include jets, needles, clips, carburetor top and other necessary parts for CV carbs
- •Made in the U.S.A

THUNDERJET

ThunderJet's

patented third fuel circuit delivers needed fuel to the engine only at higher rpm (4,500 and up)

- Designed for today's larger-displacement engines, with a higher capacity fuel delivery tube for increased volume when used in larger, high-rpm engines
- •Allows use of the main jet to tune for smooth, broad mid-range power - supplement the top-end with the ThunderJet
- Jets are used to control the amount of fuel sent to the engine
- •Comes with complete installation/tuning instructions and extra jets
- •The system can operate over a wide range of altitude and atmospheric conditions
- Made in the U.S.A.

NOTE: Some machining of carb body is required.

NOTE: Legal in California only for racing vehicles which may never be used upon a highway.

PART #	DESCRIPTION	SUG. RETAIL

POWER NOW

- Provides more horsepower and power at 1/4 and 1/2 throttle
- Mounts into the backside/airboot side of the carburetor
- Slices the single air venturi going through the
- carburetor into two smaller, faster venturis via the Power Now "Power Plate™
- •The Power Plate has a precisely positioned hole to drastically increase the speed of the top and bottom venturis, thus creating more horsepower and power for your bike

TURBULATOR

•The turbulator uses a fixed-vane vortex design that turns your intake manifold into a violent mixing chamber

 These vanes eliminate heavy droplets of fuel, fuel stacking and keep fuel from puddling

•The result is no more load or dive spots

- just crisp, clean throttle response throughout the powerband

•Complete atomization also increases fuel mileage and eliminates stand-off

Made in the U.S.A.

FLANGE-MOUNT INTAKE **MANIFOLDS**

Can be used to replace stock "compliance fitting" manifold on 84-89 and stock rigid-mount manifold from 90-99

Use with stock or S&S cylinder heads

•For use with stock 5.5550" length cylinders

•Requires the use of S&S intake seals and flanges (sold separately)

PART # DESCRIPTION SUG. RETAIL FOR 84-99 EVOLUTION-STYLE BIG TWIN 1050-0109 For S&S E, L, Super A, B, E, H-D Tillotson, Bendix,

and Keihin carbs (no MAP sensor port) \$83.95 1050-0110 For Super G carbs (no MAP sensor port) 83.95

MANIFOLD CONVERSION KIT FOR 80" EVOLUTION

 Kit converts stock 80" Evolution manifold to a more rigid-mount system

 Eliminates cracking and leaking problems associated with the stock rubber compliance fittings

•Includes an S&S Performance manifold, mounting flanges, two specially molded O-rings and two .350" spacers for spacing

out the stock air cleaner or carb mount bracket

•Fits 84-99 80" models if flange-type carburetor or adapter is used

•Replacement flange seals also available

Made in the U.S.A.

NOTE: Not for use with an S&S G series carb.

PART #	DESCRIPTION	SUG. RETAIL

breathers screw directly into cylinder heads

•Allow a clean, simple way for the engine to "breathe" correctly

PART # **DESCRIPTION** SUG. RETAIL 2106-1001 For all 93-99 Evolution Big Twin and 91-09 XL \$99.95

CRANK VENTS AND SPACERS

- •Unlike any other vent
- •Longer stem allows room for most air cleaners
- Check ball and valve ensures one-way flow
- •Take blow-by out of the heads or crankcase and suck it out the vent which allows pressure to be released, improving motor efficiency
- •Increase gas mileage, horsepower and life of the motor
- •Stem vents are used on Evolution and Twin Cam engines that breathe through the heads; inline vent is used on models that breathe through the crankcase
- Polished aluminum finish
- •Crank vent spacers are required when using stem vents with any Speed's Performance Plus high-velocity or Speedy Flow air cleaner kit; can also be used to custom space other crank vents or breathers

 Crank vents 	old each; spacer kits include two .300" x .990'	' spacers and two	.615" x .990"	spacers with O-rings

AIR CLEANER BREATHER KIT

•Enables the mounting of most aftermarket air cleaners to late-style engines that breathe through the cylinder heads •Fittings can be rotated 360° so that hoses can be routed

Hose sold separately

as necessary

PART # **DESCRIPTION** SUG. RETAIL DS-289055 For 93-09 Big Twin and 91-09 XL models \$45.95

CRANKCASE BREATHER KIT

 This kit provides the best looking alternative to black rubber hoses when mounting a crankcase breather system

•Features a 3/8" i.d. stainless steel braided hose crimped onto chrome banio fittings

•Outlet side of assembly is long enough to custom-route the hose and mount the breather filter in an inconspicuous location

•Includes breather filter (with mounting stud), hardware and instructions Air cleaner and carb support bracket must be purchased separately

NOTE: Not recommended for stock applications. Make sure the braided line does not contact anything, i.e. the gas tank, carb or wiring, as

uamage may result.

- •Comes pre-oiled and ready for installation
- •Made from billet aluminum with a polished finish
- •Fits XR air intake systems only

PART #	DESCRIPTION	SUG. RETAIL
1011-0896	Pro billet series air filter	\$151.95

2104-1902

FORCEWINDER AIR CLEANER ADAPTERS

- *Used to mount Forcewinder XR/Forcewinder XR-2 air cleaners to S&S E and G carburetors and Mikuni HSR 42/45/48mm carburetors
- •Carb to air cleaner gasket (5-pk) is available separately; PART #DS-173249 •Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
FOR S&S E AND G CARBS		
2104-1904	Polished adapter	\$59.95
DS-288921	Natural adapter	37.95
FOR HSR MIKUNI CARBS		
2104-1902	Fits 42/45mm carb (polished)	59.95
2104-1903	Fits 48mm carb (polished)	59.95

CORSAIR AIR CLEANER KITS

- Aggressively styled, free-flowing high-performance air cleaner •Chrome-plated die-cast housing features a high-flow air filter element supplied by Advanced Flow Engineering (aFe) for maximum performance, includes crankcase breather support bracket and all necessary installation hardware and brackets
- •Will support engines making in excess of 100 horsepower
- •Air cleaner extends approximately 6" straight out and 12¹/₂" forward of the engine

1010-0345

•PART #1010-0345 is a Corsair assembly (CV bolt pattern) for use with custom adapters, brackets, etc. for custom installation on models for which a complete kit is not offered

NOTE: Installation of this air cleaner may decrease rider legroom.

PART #	DESCRIPTION	SUG. RETAIL
1010-0344	For 93-99 Evolution Big Twin w/ CV carb,	
	99-09 Twin Cam w/ CV carb or Delphi fuel	
	injection (except 08-09 FLHT, FLHR and FLTR)	\$319.95
1010-0343	For 91-06 XL w/ CV carb	319.95
1010-0345	Corsair air cleaner assembly only	289.95
1011-1380	Repl. air filter element	59.95
1011-1381	Repl. pre-filter element	29.95

SKULL AIR CLEANER KITS

- •Extremely rigid, high-strength composite construction
- •Includes chrome outer cover, backing plate, high-flow air filter element and all necessary brackets, crankcase breathers and other required hardware included
- •PART # 1010-0221 is an assembly (CV bolt pattern) that can be used with adapters, brackets or mount kits to cover applications for which a complete kit is not available
- Sold each

1010-0220

PART #	DESCRIPTION	SUG. RETAIL
1010-0220	For 99-09 Twin Cam w/ CV carb or Delphi EFI	
	(except 08-09 FLHT, FLHR and FLTR)	\$239.95
1010-0219	For 93-99 Evolution Big Twin w/ CV carb	239.95
1010-0218	For 91-06 XL models w/ CV carb	239.95
1010-0221	Skull air cleaner assembly only	199.95

- •A high-performance line of inhaler air cleaners from Küryakyn
- Five-spoke, tiered and slotted design enhances looks and performance
- Die-cast construction Large slotted openings
- enhance airflow
- Exclusive K&N air filter design passes air through sides and outer end
- Backing plate design minimizes air disturbance as it enters the carburetor or throttle body
- Snap-in rings cover carb fasteners; radius of the inside edge of the cleaner is flow-bench tested for optimal airflow
- Threaded ports on the backing plate provide convenient locations to connect crankcase breathers or float bowl vents if needed (plugs and fittings included)
- Measures approximately 7" in diameter

STINGER TRAP DOOR FOR HYPERCHARGER™

- •If you have a need for more performance, look no further
- •Stinger trap door maximizes airflow into the carburetor or throttle body through a high-flow filter element
- Highly cost-effective way to boost airflow to any
- standard Hypercharger Easy four-bolt replacement
- for standard trap door Chrome finish

PART #	DESCRIPTION	SUG. RETAIL
1010-0145	Stinger trap door (ea.)	\$49.95

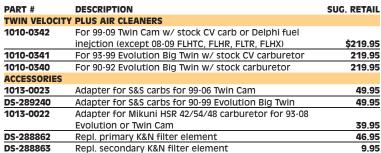

HYPER STREAMLINER

- •Gives your Hypercharger™ a whole new look
- Beautifully designed insert installs in minutes without any performance loss •Fits all Hyperchargers

(except Pro Se	eries	
PART #	DESCRIPTION	SUG. RETAIL
1014-0001	Hyper Streamliner	\$36.95

TWIN VELOCITY™ **PLUS AIR CLEANER KITS**

- Slots on both sides and enlarged openings at bottom of housing allow more air to enter the filter
- •Large, round breather element underneath cover allows air to enter the end of the filter
- Teardrop center of cover provides improved airflow and a clean look
- Internal crankcase vent system directs gasses and oil droplets into the carburetor induction module, eliminating a mess on the outside of the engine
- The result is improved airflow for better performance
- •Carb adapter and replacement K&N air filter elements sold each
- Available with a chrome finish

•Features one-piece billet aluminum

- backing plate/carb support with internal breathing system
- •Eliminates need for banjo fittings, hoses and breather filter
- •Filter is 5/8" deeper than factory Screaming Eagle filter; better flow than any stage I or II kits on the market
- •Dyno-proven to add 8-12 horsepower over stock with proper fuel adjustments
- •Reuses the stock oval outer cover
- •Setscrews keep the breather bolts from backing out over time
- •Mikuni application requires adapter (sold separately)
- Available with polished or black-anodized finish
- •Made in the U.S.A.

¹ Will fit 88-90 models, breather system is not applicable for these model years.

DS-288882

"BIG SUCKER" PERFORMANCE AIR FILTER KITS

•Features a one-piece aluminum backing plate/carb support bracket

•Eliminates the need for banjo fittings, hoses and filter

 Breather passages exit at the mouth of the carburetor, creating a virtually closed-loop system

•Stage I kit includes a high-flow filter and accepts 93-09 oval or round OEM outer cover

•Stage II kit includes a 20% larger high-flow filter and accepts an 8" round Ness or 8" round OEM outer cover

•All necessary hardware and instructions are included with each kit

NOTE: Stage I kit for 08-09 Dynas and XL models will not accept the OEM cover. Must use a round 8" aftermarket cover.

POWER PACC™ AIR CLEANERS

- •High-performance air cleaner system provides dramatic out-of-the box performance gains of up to 15%
- Precision-machined, one-piece billet backing plate eliminates flimsy brackets
- •Snap-in venturi creates 100% unobstructed air flow for increased horsepower and torque through the entire rpm range
- •Includes specially designed washable extra-high-volume reusable air filter
- •All kits include complete premium mounting hardware
- Accept most aftermarket or stock-style air cleaner covers
- •Available with or without Doherty Machines' patented PowerVents™
- •Instructions included for simple installation
- ·Made in the U.S.A.

NOTE: Not for use with Magneti-Marelli fuel injection systems.

FILTER UPGRADE KITS

• Easy-to-install filter upgrade for Screamin' Eagle air cleaners

•PART #1011-1411 includes a 3" deep washable reusable filter element with 60% more surface area than the Screamin' Eagle kit filter

•PART #1011-0782 includes a specially designed, washable pleated fabric filter that is 5/8" deeper than the factory performance filter it is designed to replace - more surface area provides more airflow is achieved (9+%) and more power is the result •Required mounting hardware supplied with both kits

PART # DESCRIPTION SUG. RETAIL 1011-1411 For 08-09 FLHT, FLHR, FLHX and FLTR models with Screamin' Eagle air cleaner kit OEM #29260-08 \$69.95 1011-0782 For 99-09 Twin Cam w/ Screamin' Eagle air cleaner kit OEM #29440-99C (except 08-09 FLHT, FLHR, FLHX, FLTR) 64.95

HIGH-FLOW AIR FILTER AND ADAPTER KIT

•High-flow filter designed especially for Super E and G carburetors

•Filter is 1" taller than standard filter and features a low-restriction, pre-oiled filter element

•Allows for a 37% increase in airflow

•Filter and adapters extend the teardrop housing out 1" for better exposure and a high-performance street racer look

•Kit installs in minutes; no permanent modifications required

NOTE: Not for use with S&S Super B or Super D carburetors, or Super E and G Kits for Buells.

90° SUPER-SUCKER INTAKE

- •CNC-machined with a chrome finish
- •Features an integrated support bracket and breather system
- Patented washable breather filter included
- •Stack system measures 41/2" L with a 4" diameter
- •Mikuni adapter converts Wimmer Super-Sucker intakes for 99-07 88" Twin Cam with CV carb/Delphi EFI to fit 99-06 88" Twin Cam with HSR Mikuni carbs
- •Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
1010-0054	For HSR Mikuni, 92-99 80" Big Twin	\$598.95
1010-0055	For S&S E and G series, 92-99 80" Big Twin, S&S 96",	,
	107" and 113" motors	598.95
1010-0203	For S&S E and G series, S&S 111"/117"/124" motors	598.95

2110-0069

PERFORMER RPM WET NITROUS SYSTEMS

- •Nitrous oxide provides serious horsepower at the push of a button
- •Easiest way to get a huge horsepower increase; adjustable jetting for 20, 25, 30 or 35 horsepower
- Complete kits are specifically designed for individual applications
- •To prevent the chance of detonation and costly engine damage, an electronic module and rpm sensor prevent nitrous activation below 4300 rpm
- •Activation of nitrous at a low rpm is the cause of most engine failures with other systems; this is eliminated with the Performer system
- •The Performer system activates the fuel solenoid just before the nitrous solenoid for a more accurate delivery of fuel and nitrous and more reliable use
- •Stainless steel jets will not erode like brass jets found in other systems
- •Require the purchase of the correct nitrous plate for your carburetor or throttle body; carbureted application should have a dual-outlet petcock installed; sold separately
- •2-lb. bottle kits come complete with all brackets and hardware
- •12 oz. bottle kits require correct mounting brackets; sold separately
- •Optional Double Bottle kit allows a second 12 oz. bottle to be added to existing 12 oz. nitrous kit; includes bottle, bottle bracket, hose and special tee fitting requires correct side frame brackets (sold separately)
- •All bottles feature a highly polished finish
- •Optional adjustable nitrous control module has two rpm settings; first setting controls the rpm level when the nitrous is activated, and the second controls the rpm level when it is deactivated; tuner can select both minimum and maximum rpm settings

NOTE: Delphi fuel-injected bikes require the purchase of PART #1023-0015.

NOTE: 04-06 models require inductive rpm sensor PART #2211-0030 for installation of Edelbrock Wet Nitrous systems

activates the nitrous and extra fuel after three parameters are met: bike speed, rpm and throttle open

•The NADS kit includes the air cleaner backplate, nitrous solenoid, spray nozzle, arming switch assembly, air filter and nitrous line

- •Model-specific bracket/bottle kits mount the nitrous bottle to the front frame downtube, requiring only a single line to be run from the nitrous tank to the solenoid on the air cleaner backplate
- NADS kit and bracket/bottle kits are sold separately
- •Compatible with ThunderMax Open or Closed Loop Systems
- •Maps available online at www.thunder-max.com

NOTE: Legal in California only for racing vehicles which may never be used upon a highway.

	w/ ThunderMax Auto-Tune closed loop module	34.95

REFILL PUMP STATION

- •Designed for performance retailers in the business of nitrous bottles
- Quick, safe, easy and only takes a couple of minutes to refill bottles
- Compressed air operated; requires no electricity
- •Kit includes plumbing, hoses, valve, fittings and bottle stand that transfers nitrous from mother bottle to receiving bottle instantly

NOTE: Refill station will require three to four items not included with the kit. 1. Compressed air supply (80-100 psi). 2. Mother bottle (available through local gas supplier). 3. Scale (bottles are filled by weight). 4. A water separator/filter (this will help pump service life).

PART #	DESCRIPTION	SUG. RETAIL
7807-0035	NOS refill pump station	\$1,550.95

NITROUS CONVERSION KIT

- •Designed to adapt your existing 2-lb. non-dresser nitrous kit to EVO and Twin Cam dressers (with fiberglass bags)
- Includes everything you need to install Edelbrock's 2-lb. DOT-approved polished nitrous bottle
- •Allows you to install the bottle inside a saddlebag for a "hidden" installation
- •Includes all necessary brackets, hoses and fittings for the conversion
- •2-lb. bottle not included

PART #	DESCRIPTION	SUG. RETAIL
1023-0006	For 84-06 Big Twin	
	dressers	\$264.95
